

IN THE ABSTRACT:

For the purpose of allowing confirmation of time progress during a run of a contrast agent protocol and the like on a display screen, time elapsed after freeze-off and time duration of freeze are displayed in a contrast agent protocol display region-52. In an elapsed-time-after-injection display region-55, time elapsed from the time of contrast agent injection is displayed. In a countdown display region-56, time remaining up to a scheduled time for the next operation to be made by an operator is calculated and displayed.
